Valuta Environmental Information

MANUFACTURING PRACTICES

Manufacturing Process

The manufacturing process with Valuta starts with partially recycled steel. The cold rolled carbon steel is formed and given a paint color with a low emitting powder coating.

All steel is sourced locally, within 95 miles of Magnuson Group’s headquarters in Woodridge, IL, where final assembly occurs. Magnuson Group’s vendors are carefully selected based on craftsmanship, location and environmental practices among other considerations.

MAINTENANCE & USE & DISPOSAL

Cleaning

Valuta can be cleaned using a damp cloth and mild non-abrasive cleaner.

Ergonomic

Product is designed for ergonomic use, which will continue to service life.

Recycling

At the end of it’s life cycle, Valuta can be disassembled and recycled. The body is made primarily of steel, one of the most recycled materials on the planet, and the internal rigid liner is made of plastic, which is also easily recyclable. Receptacle is designed to maximize recycling rates through design, graphics, and signage placement.
