## Construction

The unique IDEON steel rail system creates a robust, durable understructure that withstands even the toughest environments. Each component is locked in place using multiple 5/16th grade 5 hex bolts through the rails. Arms are anchored by a high performance molded joint system providing lasting durability and stability. Extra strength monofilament webbing creates excellent resilience, while high density foam provides comfort and rebound in a low-profile cushion.

# Unmatched Pattern Matching

IDEON is the industry leader in pattern matching. Our PatternMatch™ expertise links patterns to chair components for a unified look across the back, front, seat and valance. Fabric for the right and left arms are cut to be mirror images. With this technology, every chair is a perfect match. And the match can be replicated. Even years later, PatternMatch ensures the replacement perfectly matches the original.

## PatternMatch Expertise

The replacement  
perfectly matches  
the original. Every time.

## Extended Life

IDEON chairs are designed to extend their useful life with field replaceable components. It's easy to order replacement parts, and on-site maintenance staff can quickly disassemble and replace components to keep seating looking and feeling brand new.

## Sustainability

The SitOnIt Seating and IDEON Take Back Program is designed to minimize product waste and make environmental responsibility easy for our customers. We partnered with the nonprofit environmental organization ANEW to offer a return program that matches surplus seating with needy recipients or recycles it to avoid landfill.

Composium is GREENGUARD and GREENGUARD Gold certified to help improve indoor air quality and reduce exposure to harmful chemical emissions.
